

## HEALTH ECONOMICS ANALYST

The Population Health Division of the Saskatchewan Cancer Agency is accepting applications for the position of Health Economics Analyst within the Department of Performance Measurement and Epidemiology. The Department conducts cancer control activities in the areas of epidemiological research, cancer and risk factor surveillance, statistical analysis, program evaluation, and performance measurement of cancer programs in Saskatchewan.

Reporting to the Director of Epidemiology and Performance Measurement, the Health Economics Analyst is responsible for designing and conducting applied health-economic analyses, building creative economic models using the latest techniques, and providing health economics expertise to the Agency. These activities will be focused around outcome and cost effectiveness of the cancer system in Saskatchewan.

Qualifications include a Masters degree in health economics, pharmacoeconomics, or related discipline with a demonstrated interest in outcomes or health services research and cost effectiveness analysis. Applicants defending their thesis during the probationary period may be considered. Experience with analysis of health administrative databases and/or economic modeling as well as experience of applying economics to healthcare is preferred.

This position will be located in Saskatoon.

For information regarding this position, please contact Riaz Alvi, Director of Performance Measurement and Epidemiology by e-mail at [Riaz.Alvi@saskcancer.ca](mailto:Riaz.Alvi@saskcancer.ca). Motivated individuals interested in this position should forward their resume to:
