

Position Description

College/Division:	ANU College of Health and Medicine
Faculty/School/Centre:	Research School of Population Health
Department/Unit:	Department of Health Services Research and Policy
Position Title:	Research Fellow
Classification:	Academic Level B
Position No:	TBC
Responsible to:	Head, Department of Health Services Research and Policy
Positions reporting to this role:	Nil
Delegation(s) Assigned:	Nil

PURPOSE STATEMENT:

The Department of Health Services Research and Policy is seeking to appoint a Research Fellow with expertise in discrete choice experiments and choice modelling to join a growing team of researchers within this multidisciplinary department. This position will contribute to the Department's research portfolio through research exploring preferences, choice and behaviour of key decision makers in the health sector, contributions to competitive research grants and supervision of research students. The appointee will also have the opportunity to further develop their own applied and methodological research interests in this area.

The Department of Health Services Research and Policy is part of the Research School of Population Health (RSPH) at The Australian National University (ANU). RSPH is a leading school of population health in Australia. RSPH researchers have a tradition of excellence in addressing the world's most pressing population health issues, including improving health services, achieving and maintaining good mental health, healthy ageing, chronic disease prevention, infectious disease prevention, determining environmental risks to health, social and cultural determinants of health, and health for the global population.

KEY ACCOUNTABILITY AREAS:

Position Dimension & Relationships:

The Research Fellow reports to the Head, Department of Health Services Research and Policy and will work collaboratively within the Department of Health Services Research and Policy. There will be opportunity to collaborate with colleagues in RSPH and the College of Health and Medicine, as well as to actively develop national and international collaborations.

Role Statement:

Specific duties required of a **Level B Academic** may include:

- the conduct of high impact research either as a member of a team or independently in the area of preferences choice and behaviour in the health sector, and the production of conference and seminar papers and publication of original and innovative results in refereed journals from that research.
- the contribution to the preparation or, where appropriate, individual preparation of research proposal submissions to external funding bodies;
- the supervision or co-supervision of research students as appropriate;
- participation in delivery and evaluation of health services research education in the School;
- administrative functions primarily connected with his/her area of research;
- occasional contributions in the teaching program within the field of the staff member's research;
- attendance at meetings associated with research or the work of the organisational unit to which the research is connected and/or membership of a limited number of committees;
- involvement in professional activities including, subject to availability of funds, attendance at conferences and seminars in the field of expertise;
- participation in outreach activities including with prospective students, research institutes, industry, government, the media and the general public;
- other duties as allocated by the supervisor or the Vice-Chancellor consistent with the classification of the position.

Skill Base

A **Level B Academic** will normally have completed a relevant doctoral qualification or have equivalent qualifications or research experience. In addition evidence of research ability will be based on publications, conference papers, reports or professional or technical contributions.

SELECTION CRITERIA:

1. A PhD in **health economics, economics or econometrics** and a strong record of achievement as evidenced by publications in peer reviewed journals.
2. Knowledge and demonstrated experience in the design, conduct and analysis of discrete choice experiments, with expertise in advanced choice modelling.
3. Experience in carrying out both independent and collaborative research.
4. Highly developed oral and written communication skills and a demonstrated ability to communicate and interact effectively with a variety of staff and students in an interdisciplinary academic environment, including experience in supervision of staff and students as well as ability and willingness to teach at all levels within the scope of the position.
5. High level organisational skills, with demonstrated capacity to establish and achieve goals.
6. Ability to compete for external research grants or fellowships to support individual and collaborative research activities.
7. A demonstrated understanding of equal opportunity principles and policies and a commitment to their application in a university context.
